#### 4.5 Power Connector specification

The device requires 24V power supply for proper function. The Host side of is compatible with PoCXP standard and therefore doesn't require external power supply, once the Frame Grabber supports this feature too. The connector used in the unit is DT-2C-B14W-3 (Dinkle) and shown in Figure 3. The pinout can be found in Table 5.

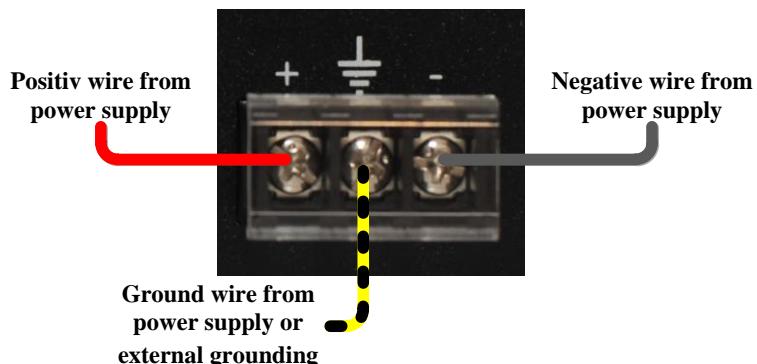

Figure 3 : KY-FEXT power connector

To reduce the risk of ground current loops the device side unit and the camera should be connected to the same ground.

Pin description	Pin number
-24V	1
GND	2
+24V	3
